CurtMAR – Short Animation Films in Portuguese

ASPEA- Portuguese Association of Environmental Education

- ✓ Project **funded by the EEA Grants** and managed by DGPM.
- ✓ Project CurtMAR aims to promote the identification of younger Portuguese with the Atlantic Ocean: history, culture, blue economy. It will focus also the preservation given, its pollution and degradation.
- ✓ **CurtMAR** – Short Animation Films in Portuguese, an education and science communication project of the **principles of ocean literacy** coordinated by Portuguese Association of Environmental Education (ASPEA) in partnership with:
 - Minho Interior Vocational School (EPRAMI);
 - Portuguese Association of Marine Litter (APLM);
 - Norwegian school Det Tverrfaglige Kunstinstitutt (DTK).

GOALS

- Mobilize schools for **citizenship actions**;
- Improve the level of **ocean literacy** of Younger Portuguese;
- Promote **ideas , debate and decisions taking**;
- Promote **exchange between schools** from north to south of Continental Portugal, the Azores and Madeira islands.
- Foster **collaborative work, sharing and exchange of experiences and information** between Portuguese and Norwegian students (Partner school – DTK), to promote Good Environmental Status of marine and coastal waters in Europe.

HOW?

- ❖ Through **knowledge sessions** in basic, high and vocational schools on **Oceans Literacy Principles** and an **Environmental Short-Film Contest**.
Through the audiovisual production it's desirable to raise this level of awareness and the effective involvement of younger people, endowed with affinity for information and communication technologies.

PROJECT INDICATORS

- The project expects to reach 850 students and 160 teachers; 100 knowledge sessions on ocean literacy subject; 40 short films contest participation; 7 videoconference exchange events between students from Portuguese schools and Norwegian school (DTK), among others.
