MARE goes to School

DESCRIPTION

Having regard to the objectives of the National Ocean Strategy (NOS) and Oceanography Center (CO), the main objective of this project is to strengthen the links between research and school community, stimulating knowledge on marine ecosystems, their relevance to society and threats identified. It will be established and measured an educational program consisting of different theoretical and practical activities that will explore topics such as the biology and ecology of the species, sustainable development, conservation, exploration and integrated management of ocean resources. There will be created and released "Biodiversity Award", that national schools can compete and that should be considered desirable to highlight a scholar project related to biodiversity in coastal and marine environments. The success and implementation of this project will strengthen and expand the CO action under the ocean literacy, providing greater proximity of students with research in marine sciences.

PROJECT PROMOTER

College of Sciences, University of Lisbon / Oceanography Centre

TOTAL COST

18.245€

TOTAL ELIGIBLE COST

18.245€

EEA Grant

15.508€

OUTCOME

Outcome#4 - Increased awareness of and education in integrated marine water management

OUTPUT

Integrated marine water management training, education and awareness raising measures and activities implemented

INDICATOR (I)

Number of awareness raising initiatives (incl. supporting materials) carried out in primary and secondary schools

TARGET (I)

15

INDICATOR (II)

Number of hits on the Ocean Literacy Website 2013-2016

TARGET (II)

20000
