Skeleton Sea Seedlings

DESCRIPTION

Skeleton Sea Seedlings aims to Turn Trash into Art! and with this promote the message “Keep the Oceans Clean!”, through interactive activities that will change daily habits and inspire communities, schools and families to take pride in their natural resources. In partnering with a local group of schools related to the Sea and Coastline, the project will develop arts-based environmental education activities with children aged 7-10, turning future citizens into skilled social scientists by training them to message the need for change in a way that appeals to hearts and minds. Developing artists are creating true “Presents of the Sea” by helping raise Ocean awareness and build community support for the adoption of more sustainable behavior. The action reminds us of what happens to waste, in a exercise of citizenship that raises awareness of environmental issues and enables participant to find suitable materials for recycled art creation.

PROJECT PROMOTER

Alexander Michael Kreuzeder

TOTAL COST

18.256€

TOTAL ELIGIBLE COST

18.256€

EEA Grant

15.518€

OUTCOME

Outcome#4 - Increased awareness of and education in integrated marine water management

OUTPUT

Integrated marine water management training, education and awareness raising measures and activities implemented

INDICATOR (I)

Number of awareness raising initiatives (incl. supporting materials) carried out in primary and secondary schools

TARGET (I)

6

INDICATOR (II)

Number of hits on the Ocean Literacy Website 2013-2016

TARGET (II)

1000-5000
